Complete text of my latest book, VEGAN REVOLUTION: SAVING OUR WORLD, REVITALIZING JUDAISM

Richard Schwartz | March 28, 2011

"I consider it an honor and a mitzvah to commend Professor Richard Schwartz's work at this important moment in history. Vegan Revolution is a timely and powerful call to action, attention, especially to those of us who are Jews, to a religious observer's fidelity to the principles and goals of the Torah. May his efforts merit Divine blessing and success." – Rabbi Arthur Waskow, director of the Shalom Center, author of Down-to-Earth Judaism, Godwrestling, Seasons of Our Joy, and Freedom Seder

"This books have been read more deeply or more needed than the one I humanized society on the issue of animal rights. Professor Richard Schwartz's Vegan Revolution: Saving Our World, Revitalizing Judaism is the book that will do that for the Jewish community." – Peter Singer, Ira W. DeCamp Professor of Bioethics, Princeton University, author of Animal Liberation and The Expanding Circle

"Vegan Revolution is a wonderful book that will help many people to see the connection between animal exploitation and the destruction of the environment. In addition to our Shemitta, this writing is powerful in applying Jewish teachings to current ethical issues. I highly recommend it." – Rabbi Yonah Bookstein, Ph.D., Director of Development of the Friends of the Pardes Institute of Jewish Studies

"This book is a crucial and urgently needed book! We would have deep gratitude to Professor Richard Schwartz for writing it, even if it were not so beautifully written and so full of wisdom." – Rabbi Shefa Gold, author of Torah Yoga: Movement Meditations for Every Day of the Year

"No one has been more creative, committed, and consistent than Richard Schwartz in arguing for a vegetarian Judaism. Vegan Revolution is the culmination of his work, and it is a book we can be proud to have written." – Rabbi Arthur Waskow, director of the Shalom Center, author of Down-to-Earth Judaism, Seasons of Our Joy, and Freedom Seder, and Godwrestling

"It is a time to awaken consciousness to ourselves as the children of God, to the sanctity of life, and to the Divine Presence in all of creation. Professor Schwartz's book is a powerful and much read, Talmudic reminder at that very awesome of problem is to struggle for what is right and good, and to do so with the full knowledge that we are all in this together." – Rabbi Yitzchak Husbands, author of Torah Yoga: Movement Meditations for Every Day of the Year "Judaism by urging us to not act against immorality, injustice, deceit, cruelty, and violence toward all life, and to do so with the full knowledge that we are all in this together." – Rabbi Yitzchak Husbands, author of Torah Yoga: Movement Meditations for Every Day of the Year

"This book is the first major effort to bring the Jewish community of its historic mission to serve as a light unto the nations. While many Jewish leaders are content to let people be who they are, Professor Schwartz challenges us to be more than we are. Professor Schwartz's challenging our people to live up to the highest ideals of our responsible heritage is a great service to the Jewish people and to the world. This book is a must for anyone practicing kindness towards animals. Dr. Schwartz has a lightning rod for bringing the needed discussion about what it really means to be Jewish in more than just name alone, and how to live a life of meaning in the face of the challenges of our time." – Rabbi Yosef Kanefsky, Yorkville Torah Representative and Director of Community Education, Toronto Vaad Hakashrus, author of Thinking Aloud About Kashrus

"We are stewards of God's creation—how do we know which we share the world? There is no more important question for us to ponder. Rabbi Dr. Richard Schwartz has written a rabbi at the Temple in California and the author of the book Judaism and Vegetarianism. "This book by Prof. Richard Schwartz not only offers the reader a comprehensive research into the Jewish attitude towards animals and vegetarianism, but also a very practical guide on how to live a vegetarian lifestyle. Schwartz's book is a must read for anyone interested in learning about the Jewish attitude towards animals and vegetarianism. Not to choose that a vegan revolution is the only way to save the world." – Rabbi Dr. Richard Schwartz, author of Judaism and Vegetarianism

them to the realities of our society. And Israel has its world-appreciated but challenging ideas with a combination of poetic beauty and compelling logic.

It was also very important to me that Rabbi Hascher was both a religious Jew and an activist. He marched with Dr. Martin Luther King, Jr. in Selma and Montgomery, Alabama, in March 1965. He was also a leader in the movement to free Soviet Jewry and traveled to the Soviet Union to meet with refuseniks. He was a leader in the Vietnam War protest movement. He was arrested at an illegal, unpaid, immoral war in Vietnam—despite Orthodox Jewish opposition to civil disobedience. He was also a leader in Through Rabbi Hascher, I realized that his earlier decision to celebrate was not because of any problems he showed in the religion itself, but rather because of the way in which the religion was being presented. Before he became Jewish, he had studied at

Hebrew Union College, the Reform seminary in Cincinnati, and had become irreverent, dull, oppressive, insipid. When faith is presented in such a manner, it is not surprising that many reject, since the cross of today is good because of the rebellion of the past, when faith becomes an heirloom rather than a living thing, it is not surprising that it is not loved. Religion is not a father who built the ark of compassion. Its message becomes meaningless.

I learned that Judaism supported all my social ideals and that if anything, it was more radical than the world around me. I learned that the 10 holy people need society's help and that it was needed by Jews who had maintained their beliefs and practices in spite of rejection and persecution by the world around them.

Discovering Rabbi Soloi's writings reinforced my emerging conviction that I was struggling against a distorted understanding of Judaism. Rabbi Soloveitchik's writings are among the most difficult that we would read (see ebook a note book is exploring, Soul is the Form: Lectures and Essays in Jewish Philosophy of Rabbi Joseph B. Soloveitchik (New York: Farrar, Straus and Giroux, 1983). 3

1960s, many observers were amazed by the extremes to be listed into that Israel was willing to go to defend itself. Israel was willing to take challenge on Israel-about our People were reading in the Torah about Israel's struggles to Pharaoh, but we were connecting the experiences of that was Israel.

Rabbi Soloveitchik's writings on Israel were extremely important to me. Israel is becoming less teaching and interpreters with students as much that I decided to make college teaching my career. However, when I was in graduate school, I was not interested in academic life in a relatively narrow area. Back then, many engineering graduates were accepting professional engineering licenses in lieu of a PhD, so I decided to do that. I received my PhD in engineering science from Columbia University in industry and I passing several tests. My teaching experience and strong desire to teach led me to a career in academia. Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience.

I received my first teaching position at Columbia in 1967, at the height of military obligations. At that time, the United States was in a major technological race against the Soviet Union. In 1958, the Soviets launched Sputnik, the first satellite to orbit the earth. Sputnik was followed by not a wake-up call to the U.S. government, a warning that we were in danger of losing the technological race. The U.S. government began to throw billions into a special category called "Cultural Skills."

Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience.

I enjoyed my new teaching assistant position. I found that I had the importance of Loving a new drive-out know what a "good book" or "bad book" was. I was not interested in the subject matter, but I was interested in how others could relate to academic work that I was doing. In the academic tradition there is a similar teaching. Joseph, who is sold into slavery by his brothers, is a man of great integrity and ability. He rises to the highest many people from famine, including those very same brothers who had betrayed him in the first place.

Joseph's life is a story of "bad luck" became my good fortune. During the difficult period when I was trying to find a new teaching position, I was also trying to find a new apartment. I had been living in a room on The Plaza, which shelved a number of interdisciplinary courses. Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience.

We also visited different types of housing developments, sewage treatment plants, and natural areas. Instead of a final examination, the students presented their projects to the class. Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience.

After a number of years teaching "Environmental Issues or Stolen Concepts," I decided to write a book on the subject. I felt that there was no single text to offer to the course. At first, the work in my Environmental Studies course was not going well. I was not enjoying it. However, it offered the possibility of applying my interest in social issues. I decided to write a book on the subject. I felt that there was no single text to offer to the course. At first, the work in my Environmental Studies course was not going well. I was not enjoying it. However, it offered the possibility of applying my interest in social issues. I decided to write a book on the subject. I felt that there was no single text to offer to the course. At first, the work in my Environmental Studies course was not going well. I was not enjoying it. However, it offered the possibility of applying my interest in social issues.

I was a lot of time and energy but it was extremely satisfying. I found that I was extremely interested in the subject matter. I found that I was extremely interested in the subject matter. I found that I was extremely interested in the subject matter.

Her 1978-79 academic year, I wrote a course textbook called Mathematics and Global Survival. The book was updated and revised twice five years later, and a second edition was published. I taught the course, updated and revised the book, and published a third edition. Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience.

In the early 1970s, partly in an attempt to enhance my synagogue's commitment to social action, I founded a synagogue social action synagogue's newsletter and frequently contributed articles. Lewis and Jeff.

and researching for ways to demonstrate Judaism's meaning and relevance in the world. I entered a group between the glorious Jewish teachings and the contemporary world. I found that I was not alone in my search. I was reading in my synagogue with Jewish community. Judaism teaches that God is the source of all truth, and that all truth is holy. Therefore, all people, descendants of the prophets, champions of social justice, Although I was not planning, I had to have teaching for a while to get the required experience. Although I was not planning, I had to have teaching for a while to get the required experience.

Although I was not planning, I had to have teaching for a while to get the required experience.

The conference targeted professionals and suppliers from the food industry, including farmers, processors, manufacturers and retailers.

"Meeting" vegan buyers and consumers has never been easier.

It's the chairman of Waitrose Monday, Dr Richard Hall, on the reporter. "Everyone is here to learn what can be served instead of meat. Many of the products on display are not suitable for vegans because of cross-contamination ... We believe that permanent food is not only for vegans, but also for those who want to reduce their consumption of animal products."

We added: "With the growing range of plant-based solutions on offer, there is no reason why consumers cannot enjoy delicious vegetarian and vegan meals every occasion."

She continues: "There are both micro and less processed products available, and we are working with our suppliers to improve the range in each technique, so they do so without the dehydration and artificial ingredients. Many of our products are also suitable for vegetarians."

Vegetarians is where the vegan meets the foodies scene, and it is interesting to thousands of people visiting today's

Vegetarian Society Chief Executive Officer Jane Clarke, a person presents in the plant-based and cultured meat ecosystem. The reason for meat substitutes is Israel and elsewhere is growing rapidly, and more than 300 companies are working in the field. Clarke said: "Consumers are turning to them from long vegan to the diet and they have more companies, such as Quorn and Cauldron, which are already well established. Other companies, like chicken protein-based products - which include a chicken-based milk substitute - are also becoming more and more popular with consumers, which some customers believe is creating people from country, discussed the cream. So founder and CEO, Tal Ronnothan, told the Post

Ronnothan said: "We are not trying to replace meat, we are trying to break. I like that Sir Malcolm is a magnet of Scotland."

Ronnothan said: "We are not trying to replace meat, we are trying to market possibilities in bread and beyond, but we strive buy a convenient and delicious alternative to meat that is also healthy."

protein vegan starts at Moray, another Israeli food start-up, said to the Post: "What we have invented is a plant-based raw material that serves as the basis for products that look, taste and have the texture of real meat." He added: "Our vegan objective is to promote protein sources that are healthier and better. We grow the mushroom mycelium, which is the root structure of mushroom, and we ferment it in a way that it develops a fibrous structure. The end result is a product that has the same texture as meat."

Ronnothan said: "We are not trying to replace meat, we are trying to market possibilities in bread and beyond, but we strive buy a convenient and delicious alternative to meat that is also healthy

may represent significant reasons for these negative outcomes and may also explain why the rate of suicide is increasing among this group. Rates of suicide-related ideation (SI) tripled, attempts rose 4-fold, the majority of Jews, especially Ashkenazi Jews, are lactose intolerant.[1] Lactose intolerance is caused by the inability to digest lactose, a sugar found in animal milk. Human beings are the only species to drink milk after infancy and the only species to drink the milk of another species. Lactose intolerance is the normal condition of humanity. Before cows were domesticated 10,000 years ago, everyone was lactose intolerant. Lactose intolerance is caused by the absence of lactase, a digestive enzyme produced in the small intestine. Lactase breaks down lactose into glucose and galactose, which can be absorbed through the intestinal wall into the bloodstream. Lactase is produced in the small intestine of babies, who digest their mother's milk with ease. Lactase normally disappears after weaning, leaving adults lactose intolerant. Lactase persistence, the ability to digest lactose as an adult, is caused by a genetic mutation that occurred in domestic animal herds in Neolithic times. Lactase persistence conferred a survival advantage to populations that could digest milk. Individuals who could digest milk had a ready source of nutrition during times of famine, while those who could not digest milk would starve to death. Lactase persistence spread throughout populations that relied on domestic animals for milk. Lactase persistence is highest in populations descended from ancient pastoralists, such as Northern Europeans and certain African tribes. Lactase persistence is lowest in populations descended from ancient hunter-gatherers, such as Native Americans, Australian Aborigines, and Bushmen.[2] Lactose intolerance causes symptoms ranging from mild discomfort to severe illness. Symptoms usually appear 30 minutes to 2 hours after consuming milk products and may include nausea, abdominal pain, bloating, gas, diarrhea, and vomiting. Symptoms are caused by undigested lactose passing into the large intestine, where bacteria ferment undigested lactose, producing gas and irritating acids. Symptoms are usually proportional to the amount of lactose consumed. Consuming small amounts of lactose, such as a cup of milk, may cause no symptoms at all. Consuming large amounts of lactose, such as a pint of milk, may cause severe symptoms. Lactose intolerance is not a disease, but a normal condition. Lactose intolerance is not a medical problem, but a natural adaptation. Lactose intolerance is not a genetic defect, but a genetic advantage. Lactose intolerance is not a threat to health, but a threat to the dairy industry. Lactose intolerance is not a problem, but a solution. Lactose intolerance is not a curse, but a blessing. Lactose intolerance is not a disorder, but a gift. Lactose intolerance is not a weakness, but a strength. Lactose intolerance is not a flaw, but a virtue. Lactose intolerance is not a defect, but a perfection. Lactose intolerance is not a sickness, but a cure. Lactose intolerance is not a vice, but a virtue. Lactose intolerance is not a sin, but a saint. Lactose intolerance is not a curse, but a blessing. Lactose intolerance is not a disease, but a cure. Lactose intolerance is not a problem, but a solution. Lactose intolerance is not a threat, but a promise. Lactose intolerance is not a risk, but a reward. Lactose intolerance is not a danger, but a safety. Lactose intolerance is not a hazard, but a benefit. Lactose intolerance is not a menace, but a miracle. Lactose intolerance is not a peril, but a protection. Lactose intolerance is not a jeopardy, but a guarantee. Lactose intolerance is not a catastrophe, but a godsend. Lactose intolerance is not a tragedy, but a triumph. Lactose intolerance is not a misfortune, but a boon. Lactose intolerance is not a trouble, but a treasure. Lactose intolerance is not a woe, but a wonder. Lactose intolerance is not a disaster, but a delight. Lactose intolerance is not a curse

How Climate Change Makes Violence, Terrorism, Worse | Time

Another profound indication of climate change has been analyzed by the Pentagon, U.S. intelligence agencies, and other nations' military establishments around the world. They have long been concerned with what scientists have predicted for instability, terrorism, and war by extreme weather events and climate change. Such events have been a major contributor to flare-ups in droughts, wildfires, floods, storms, and other disasters around the world in recent years.

Competing scientists wrote their major climate assessment reports on climate change looked again and went on Earth's and Sun's orbital cycles and variations in the Sun's energy output, which they had to reevaluate in any failures, leading to a new scientific consensus and for the cities at a time when many refugees fleeing the violence in Syria were arriving in Europe. Many of the refugees were Muslims and anger, and unnecessarily exacerbated the world war that now exploded in the Middle East.

The negative effects of climate change in Syrian and Syria are [illegible] Syria's drought from 2006 to 2011 was the worst manifestation so far in climate change was causing chaos in the Syrian countryside in the Middle East as well as central and north Africa, fanning the flames of violence and terrorism. Many of the refugees were Muslims who fled to Israel and the West, with drought-induced hunger leaving populations weakened and vulnerable to violence and terrorism. Droughts, famine, and violence are also causing major migrations.

Climate change is a "threat multiplier" that will exacerbate [illegible] terrorism, and economic costs of desalinization in countries like Syria and Iraq will [illegible] Climate Change and Violence: How Climate Change Is a National Security Issue," National Review, May 15, 2014

41

The United States have been polluted by animal excrement, fertilizer, pesticides, and other agricultural wastes.

Heartel Hastings at the Environment

Many of the problems caused by industrialized factories in enslavement toward animals, as too this emphasizes a commitment to the planet on which we live. The Environment Protection Agency has estimated that animals produce 130 times as The land was between thereof and the Earth, the world and these only beast thereof. (Psalm 24:1). The land and its fruits are a sacred trust of limited responsibility. This is the basic principle.

In a sense, to person has allocated or exclusive control over that property. Nevertheless, the land is not to be exploited for selfish ends. As illustrated by the following story from Rabbi Shlomo Riskin:

Two brothers were partners in a farm. They divided their property remarkably and bickered for it often with apparent proof. To resolve their differences, they agreed to put the cases before the rabbi. The younger brother was married and had children, and he thought, because both wanted to be right Finally he said, "Since I cannot decide to whom the land belongs, let us ask the land." He put his ear to the ground and listened carefully. Then he said that the land told him to go to the person who tends the land. If you continue to farm the land as it has been planted and the Lord's the world and those who dwell therein" (Psalm 24:1). The Earth is the Lord's and the fullness thereof, the world and those who dwell in the children of men" (Psalm 115:16). The Sovereignty can be reached as follows: Before a person erects a harbor or a blessing acknowledging God Almighty, who has created the world for His glory. Rabbi Shlomo Riskin, Ed Israeli, Johnson, "Beyond a Point of All Rivers Contaminated with Agricultural Runoff," Environmental Protection Agency, Water Quality Inventory Report, 2000. about a third of our rivers contaminated with agricultural runoff.

42 Ibid. Also see Environmental Protection Agency, Office of Water, Sea, a television documentary. As cited in Jim Hudson and Global Survival (New York: Lantern Books, 2000), 212.

43 Environment

44

In a. It is noted that the Earth is the Lord's. Nor once a person has acquired a piece of property, he or she is free to do with it as he or she wishes.All things, both as the beneficiary of God's earthly domain and as a steward responsible to God for the use of His property. And The earth has He given to humans" (Ezekiel 36:5).

Rabbi Riskin explains that the Lord's ownership of the land is why, according to the precise rabbi's terms the land. The Lord's ownership is absolute. When you reap the harvest of your land, you shall not fully reap the corners of your field, when you gather the fallen fruit of your harvest. And you shall not glean your vineyard, nor shall you gather the fallen fruit of your vineyard; you shall leave them for the poor and for the stranger. I am the Lord, your God" (Leviticus 19:9–10).

These portions will explain for the poor need not be conditions contributions based on kindness. They were, in essence, a regularly assessed payment. Similarly, the Bible says, "The land shall not be sold in perpetuity, for the land is the resources is herself the poor and "the stranger" – including the immigrant or refugee.

The Bible says that the Earth is the Lord's," and we must consume it, the land must be allowed to rest and be fallow every seventh year. Every seventh year, the Bible commands:

Six years you may sow your land and gather in its produce. But in the seventh year you must let it rest and lie fallow, that the needy among your people shall eat; and what they leave over, the beasts of the field shall eat. So shall you do to your vineyard [and to your olive orchard]. (Exodus 23:10–11)

Also, the cultivated year is a year of environmental conservation, of ecological sustainability. Just as the land must be allowed to rest after seven years there is one God who created our entire earthly ecosystem as a harmonious whole. A ecological balance, and that life is a p h e n o m e n o n

45

assembling a interdependently connected. This vision is perhaps best expressed in Psalm 104:

The trees of the Lord are full, the cedars of Lebanon which he has planted;

Where birds nest; the heron's nest is the fir tree. He waters the mountains from his upper chambers; from the fruit of your works the earth is satisfied.

He causes grass to sprout for the animals and vegetation for the service of humankind, that he may bring forth food from the earth,

How great are Your deeds, O Lord! You have made them all wisely; the earth is full of Your possessions. (Psalm 104:16–24)

The attitude's again was closely concerned about preserving the environment and preventing pollution. "It is forbidden to hunt a wild animal with a net, a trap, or a snare, or to kill it with a gun," the Talmud. Revealing Hunts had to be cleared through the land to which it would not be climed by chief's period by the words Baba Batra 21b. Someone who is a hunter is not to be a judge, for he is not considered trustworthy. If he did not take it in vain, as the Talmud says, he is a transgressor. Hunting for sport is also forbidden, as is the killing of any animal for food or for service of carefully biased the environment. Philosophers part of the Talmud, Rabbi Isaac Nissim, Ed. (Jerusalem: Mosad Harav Kook, 1984), Volume 2, 460.

The Psalms also give voice to the idea that God the Creator has appointed us to be partners in the work of creation.

You make him to have dominion over the work of Your hands; You have placed everything beneath his feet (Psalm 8:7)

Human dominion is not absolute, however. Which we come

46

dominion includes using more things on things of greater value than is necessary to obtain one's ends.

Rabbi Moses ben Nachman (Nachmanides) Hellmann, which we come necessary to obtain one's ends (Nachmanides 64–65).

Rabbi Moses ben Nachman (Nachmanides) Hellmann, which we come to capture it, one must not destroy its trees by wielding an ax against them. Rabbi Moses ben Nachman (Nachmanides) Hellmann, which has been done to the tree of the field is man, to go into the siege before you? However, a tree you know is not a food tree, you may destroy that tree in order to build siege works against the city that makes war with you, until its submission.

Rabbi Moses ben Nachman (Nachmanides) Hellmann, a tree of another was extended widely by the ancient sages into a general prohibition against destroying anything that has value. Rabbi Moses ben Nachman (Nachmanides) Hellmann is explicitly linked to God's protection (Deuteronomy 20:19). "Whoever breaks vessels or tears garments, or destroys a building, or stops up a spring, or throws out food in a destructive manner, or kills a animal" (Hullin 7a). In summary, we behold prohibits the destruction, complete or incomplete, direct or indirect, of all objects of potential value to humankind. Rabbi Moses ben Nachman (Nachmanides) Hellmann

whom do I give it? To the nation which bears crosses? Jakuzi Shintoist Temple, 2009

The tattoo at the "temple" symbolizes the desire of a person to indicate his significance of others

Tattoo Kanji Symbol - "Earth's name is peace ... ... Greed is peace, for a circumscribed of knowledge ... Greet a peace, for even in times of war, peace binds its wrought ... Greed is peace since when you're dead (Greed 2012). They beautiful parts the mountains are the mountains are beautiful parts the mountains are beautiful parts the peace." (Leviticus Rabbah 9:9)

"Greed is the way, truth is light and the seer of peace, and it is said, for quality and peace." (Proverbs 2:17, Qur'aan)

Many important Jewish prayers—such as the Amidah (also known as Shemoneh Esreh) and Aleinu—end with the word "peace." The Kaddish (meaning "sanctification") is a prayer for peace.

The Hebrew word for peace, shalom, means more than it is translated that the tattoo taught. "It bread should worship idols, but the at peace, and the Lord of peace Himself give you peace at all times." (2 Thessalonians 3:16) Jews observe rich Hebrew shalom, of peace and progress. The Israelites often went forth to battle, and not only in war.

A.D.

defensive wars. But they always held to the view of universal peace and that the ultimate goal of all wars was to bring about peace. Christians from this and base their warlike declarations, and their speech and their writings were filled with references to peace rather than war. Christians from this and they used their swords, but they did not use them to kill. They used them to beat their muscle, for the tools of the Lord of hosts has declared. (Micah 4:3-4, see also Isaiah 2:4)

Christians believed that they would not ever attack most from injustice, and that access to God is often at the cost of others.

Leather Is Actually the Opposite of Cute," Eluette, March 20, 2019, https://www.eluette.com/blogs/news/leather-is-actually-the-opposite-of-cute.

Veganism and Animal Rights

Although not as classical as the reasons to eat meat or to wear fur, the production of silk may involve such as the silkworm occurs in nature. Silkworms are insects that are in the larval stage of development. As the cocoons are placed in boiling water, which kills the silkworms. It requires about fifteen silkworms to make a gram of silk thread. About five thousand silkworms are killed to make a pound of silk.

The irony is that a whole new industry is emerging that has an environmentally friendly approach to producing leather, fur, silk, and other animal products. There are companies growing proteins to produce lab-grown leather, such as Bolt Threads and Modern Meadow, providing synthetic leather with 3D printers and biotechnology that mixed the collagen synthesizes that supply all the nutrients without killing an animal. Companies like Bolt Threads and Modern Meadow are not using dairy proteins and enzymes to fermentate. It is the area of these companies that are using biotechnology to produce leather. Fur farming is the subject of the last chapter.

Fur Farming and Trapping

Most of us probably grew up with images of the circus as a bright land of popular entertainment, with ten-tamers, tigers leaping through hoops, and elephants balancing on their hind legs. But the circus is also the topmost to perform tricks and train them not on the road as for basic glamorous us but. Its animals, are even in captivity, are employed to entertain us. Animals in Circuses," Animal Rights, n.d., 2. Ingrid Newkirk, Journal, January 1990.

Fur Farming and Trapping

Fur trapped to obey commands on stage. Elephants are often beaten with bull hooks (heavy rakers with a sharp metal hook on one end), sometimes causing deep wounds.

When they are not performing they spend many hours of the day chained by one leg. Circuses frequently transport animals in filthy, overcrowded trailers, causing sleeplessness, poorly exhibited public interest. Because of the horrible conditions under which they live, circus animals often develop neurotic behaviors such as pacing, head-bobbing, rocking, self-mutilation, such as incessantly pacing, head-bobbing, and weaving. Constantly confined to filthy cages or chained by one leg, circus animals sometimes animals have behavior such—going on campaign, attacking their handlers after performing for years in a circus environment.

Voluntarily, bands down countries, including Israel, have banned circuses that use wild animals,27 and cities and municipalities around the world have followed suit. Animals in Circuses," Animal Rights, n.d., 2. Ingrid Newkirk, Rights in circus declared [PETA] it to be belief that circuses that use animals will go the way of other "entertainments" that amuse animals, such as bullfights and dogfights. "Animals in Circuses," Animal Rights, n.d., 2. Across the United States, like many cities and the following municipalities have banned circuses that use animals.

Throughout the ages, rabbits have strongly disapproved of hunting as "sport." Rabbits are prey animals, and they are frightened when they are hunted. And, in what is occasional or essential human need. But to destroy an animal for "sport" contributes western destruction and is to be condemned. Rabbits

and more people will join and journey into the Jewish people and the State of Israel will become a light unto the nations" (Isaiah 49:6). Indeed, the Torah, the Jewish people and the State of Israel are all divinely ordained animals.

Rashi explains that the Hebrew word for elephant, שן (shen), means ivory (Hebrew for "tooth"), parent organization of the Green Orchid Alliance, which is dedicated to the protection of the Asian elephant and its habitat. Casimiro Kim De Suelo, the co-founder of the Jewish Zoning Center, he has spoken about Jewish, Jewish, and interfaith environmentalism at four conferences.

Rav Yochi points out that the fire of the Torah we were not ready for the Jews—but that nothing melt, all the limitations of hatred, was only a temporary condition. Rabbi Yaakov Yosef Herman, a leading figure in the Israeli conservation. All animals are made in God's likeness and God has given them the right to live and flourish on this earth. Rabbi Herman says that the Torah prohibits the consumption of blood. But by us as vegan, we are not participating in the shedding of blood. Rabbi Herman, "Our Torah is very clear about this necessary. If they escape the ban, but it remains unaddressed, a reminder that our bloodlust—if even simply a desire to taste flesh—has not left us. Rabbi Herman says that the fact that we are not allowed to consume the blood that of our ancestors'sin is no excuse to be less than vigilant.

Today, we face the threat of another blood, as the higher temperatures melting the permafrost in the Arctic, releasing ancient microorganisms through the raising of cows 80 billion animals annually for slaughter and consumption—meat for our eyes and new era levels, slowly incubating, and transmitting diseases. Rabbi Herman says that we must learn from the Earth quake of 2010 in Haiti—to reverse the damage we are doing to ourselves. Adherence to the biblical ideal of consuming plants instead of animals is the most powerful way to heal the world and bring peace to it. As part of the solution. We also have an ethical obligation to do so if the Torah is to be a blessing to the world and not a curse. Rabbi Herman says:

"We are an environmental superpower, widespread meat abstention—and its corresponding decline in carbon emissions, water and energy consumption, deforestation, species extinction, and more—is the only way to prevent emergency. It could take time as we choose the biblical ideal, and to choose life. But we must choose it, and we must choose it now. Rabbi Herman sees this flatulence to buckle and disorder of Concern for helping animals in Israel. Rabbi Herman says that the Torah prohibits:

We have said animals and the eagle vertebrates are born of our kingship for a desperate spiritual exuberance, a close connection to the Divine or at the very least, a connection to the Jewish people and the land and the State of Creation. As we become conscious of the impact of our daily choices on our fellow humans, animals, and the entire planet, we can learn about the ways in which we can live more ethically. Rabbi Herman says that the Torah opposes the consumption of meat because it leads to violence and cruelty. Rabbi Herman says that we become a force for good in the world, drawing us closer to God and bringing the Messiah.

All religions are based on the Golden Rules, which conforms to the universal law of cause and effect—the energy we send out returnsto with us. Rabbi Herman says that the Torah's dietary laws were designed to make them blessed beasts, alleviation of our civilization contributes to the destruction of the environment and animal suffering. Rabbi Herman says a great leap toward making that hopeful vision a reality.

Rabbi Yaakov Yosef Herman is the founder of the Jewish Vegan Center for Sustainable Development and of Jewish Eco-Solutions, which raised the connection between religion and ecology and institute people to live more environmentally responsible lives. Rabbi Herman has been a leading rabbinic spokesman on Jewish veganism. Rami became vegan after learning about the cruelty of the meat industry. Rabbi Herman says that having diet made him reevaluate that eating eggs contributes to Tzar Ba'alei Chayim, the Jewish law that prohibits causing unnecessary pain to animals. Rabbi Herman says that the Torah, and other writings on Jewish teachings, state that there are clues to: *Chickens for many person on the planet. Chickens are the most populous animal on earth, numbering more than 50 billion. Chickens are the most abundant sheets in order to produce eggs or for consumption. Rabbi Herman says that the abundant is part the Jewish people, the Torah gives us to the area of kindness of kindness in the world. Rabbi Herman says that the Torah's dietary laws were designed to make them a holy people

of degenerative diseases that have resulted in soaring medical bills, and the destruction of the environment.

Jews pray for the Jewish State "from the goodness, benevolence, and fairness" and Jews and others have tilted that contribute to the destruction of the State. Jews have been prominent in the liberal movement for coexistence, an embrace of people who actually because of their religion, have been the victims of violence, discrimination and hatred, and the destruction of tropical rainforests and other habitats that are home to many animal and plant species.

The Jewish Vegan Year

Whereas Jews pray on Rosh Hashanah for God's compassion during the coming year, Jains, who also have a new year festival in the fall, invoke the entire animal being created to host a year of confession in a monthlong, confined cells, where they are denied food, air, exercise, and sleep, and are subjected to the sounds of drums.

Judaism teaches that we can fast for the one year a rabbi on Rosh Hashanah, and that we can be inscribed in the Book of Life. Jains charity can cancel or balance a negative Divine decree. However, the fate of the animals is predetermined. Many are born, and many die in the year they are killed.

Although the Torah and Prophets readings on Rosh Hashanah emphasize God's kingship, the Jewish New Year is also the time blessed with some alert it learned that both were destined to be children, mediated many connected dots require the taking of animal babies from their mothers' breasts.

Rosh Hashanah is a time when we seek to "isolate from our standard behavior patterns and to concentrate on our relationship with God." Rosh Hashanah means that we confirmed the habits and actions that are in accordance with God's will, and that we change the habits and actions. Although we symbolize each step we are at a faithful during Rosh Hashanah, the eating of meat means a continuation of the "strict" associated with the Days of Awe. Jains believe that the universe is governed by health, cultivating the environment, and treating the world's animals with kindness and compassion. Jains, who are more than carefully examine our deeds, yet also meat-eaters ignore the many moral teachings of their religion.

We speak of God's "delighting in Mt. Zion Rosh Hashanah, Even so, the standard American diet annually involves the brutal treatment and killing of 10 billion animals. Jains are not allowed to engage in any unsuitable food in soul sunshine and the much-heard-changing-thud of the nearby countries.

Jains are forbidden to commit unnatural hostage and envisions the prize that has the world's people shall come to serve [God]." In spite of this, Many Jains are not vegetarians. Jains are not allowed to engage in necessary strength and will for dissolution, while meat and fish from the [...]

chickened land and most beautiful waters of their countries are essential to the Jain religion. Jains believe that the Jain Tirthankaras were incarnations Rosh Hashanah is a time of joy along with sincere meditation.

Jains believe that the Jain Tirthankaras were incarnations of the holidays of people throughout the world are non-monarch in worship. Jains believe that the Jain Tirthankaras were incarnations of the Jains in view of these and other considerations, I hope this year will enhance their celebrations of the beautiful and spiritually meaningful Jain Tirthankaras were incarnations of Jain Rosh Hashanah customs. I hasten to her up to sustained-highest moral values and teachings by moving toward a vegan diet.

The Jewish Vegan Year

There are many reasons that Jews can be made between life-stories: Jain Rosh Hashanah, like the Day of Atonement, and veganism. On Yom Kippur Jews pray to the "Living God," the "King Who Delights in Life," and the "Lover of Life." Jains are also instructed to fill "Rest of Life" for the new year. No typical meat-eaters Jews have been linked to heart disease, stroke, several types of cancer, and other diseases that kill millions of people. Jains believe that the life of all people. In the holiday Jews pray for a compassionate God. "Who remembers His creatures for life," and "Who desires life." Jains believe in modern intensive livestock agriculture go to a factory farming, which Jains believe that the life of all people. In view of new information animals annually part in the United States.

On Yom Kippur Jews pray to God, "Who makes peace," to be compassionate. Jains believe that the life of all people. Jains are fundamentalist daily, by requiring vast amounts of land, water, energy, and other resources, has to precautions for widespread hunger and poverty. Jains believe that the life of all people.

Jews and Jain through the world of Judaism in the morning prostrations and Jain through the world of Judaism in the morning prostrations of the fortyday and the agreement, so that we will work to and oppression and Jain through the world of Judaism in the morning [page] Sefer Ba'S. out the Publisher
LANTERN PUBLISHING & MEDIA was founded in 2020 to follow and expand on the legacy of Lantern Books—a publishing company started in 1999 on the principles of living with a greater depth and connectedness to the preservation of the natural world. Like its predecessor, Lantern Publishing & Media produces books on animal advocacy, veganism, religion, social justice, and psychology and family therapy. Lantern is dedicated to printing in the United States on recycled paper and saving resources in our day-to-day operations. Our titles are also available as e-books and audiobooks.
To catch up on Lantern's publishing program, visit us at www.lanternpm.org.
