

FUN FACTS ABOUT CEPHALOPODS!

From squids and octopuses to nautiluses and cuttlefishes, cephalopods are amazing!

DID YOU KNOW ?

Some octopuses will use shells to hide in or as cover as they move along the ocean floor as a means of protection?

Humbolt Squids communicate with each other by brightening the color of their skin in different areas of their body!

Cuttlefishes have great episodic memories but, unlike humans, this ability to recall, for example where and when they had a tasty meal, gets better as they age!

Scientist observed a deep sea octopus, named "Octomom", guard her clutch of eggs for 4.5 years, protecting them from predators!!
