SCOTT & WHITE MEMORIAL

Inspection

Type: ROUTINE INSPECTION

Date: OCT-13-2005

**2.33 ( a )**

**ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.**

Each research facility shall have an attending veterinarian who shall provide adequate veterinary care to its animals. Expired drugs were noted in the pharmacy. This noncompliance was pointed out and explained to management. Management was informed that the use of expired medical materials such as drugs, fluids, or sutures on regulated animals is not considered to be acceptable veterinary practice and does not constitute adequate veterinary care as required by the regulations promulgated under the Animal Welfare Act. All expired medical materials found in a licensed or registered facility are to be brought to the attention of the responsible official. The facility must either dispose of all such materials or segregate them in an appropriately labeled, physically separate location from non-expired medical materials. The Animal & Plant Health Inspection Service (APHIS) has no jurisdiction over facilities using expired medical materials for non-regulated animals or non-regulated activities. Corrected immediately.

The last routine inspection was conducted on 10/13/04. This routine inspection and exit review were conducted with management and USDA VMO, Earnest Johnson.

Inventory: 17-ferrets, 12-squirrel monkeys, 11-pigs and 8-rabbits.

Note: During the exit review, proper storage of materials, overhead flaking paint, and overhead condensation were explained as required by the AWA.
