*Help us end cruelty in places where people worship!*

Throughout the ages, human beings have accepted killing, violence and violent behavior as just being a part of life. And organized religions have perpetuated and endorsed this kind of thinking, burying their collective head in the sand.

Churches talk about peace and love and compassion while we take pleasure in hunting animals, bull fights and cock fights, horse racing and fishing. In places of worship, people wear clothing made from the furs and skins of tortured animals.

And most importantly, our diets are based on violence toward and the deaths of billions of animals. And these kinds of meals are supported, endorsed and promoted by most religions.

We are urging people of faith to include all of God's creatures in all programs, activities, sermons, events and fundraisers.

### **Mission and Purpose of All-Creatures.org**

To promote through education the prevention of suffering and cruelty to any of God's creatures, human or otherwise, including, but not limited to their diet, their health and their living conditions.

To promote through education the elimination of the use of animals in biomedical research and testing, their use as food, or their use for any and all commercial purposes; and to protect the environment in which we all live, so that no living beings suffer from its destruction or pollution.

To support organizations that have similar goals of preventing any harm to any of God's creatures, human or otherwise, or to the environment.

To provide an internet archive of educational materials to assist both teachers and students in the furtherance of cruelty-free living.
